

# WHEEL LOCK WORKS AS GOOD AS IT LOOKS.

With repeated use, standard wheel locks will eventually loosen and fail. Not ours. Newton Wheel Locks feature an ingenious spring mechanism that's significantly more durable and functional than a standard wheel lock. Plus, they're engineered from composite materials, so you save 1.3 oz compared to their aluminum counterparts.

Because they're Newton components, they offer awesome aesthetics. Newton Wheel Locks. The lighter, more secure, more durable solution.

- Ultralight composite construction — 1.3 oz. (38 g) lighter than conventional wheel locks
- Spring mechanism engineered for greater reliability
- Resists loosening over time
- Sleek Newton aesthetics
- Also available with 6" extension handle

## The Newton Story

Newton high-performance wheelchair components are born from our impatience with the status quo. Every Newton component represents a total rethink of what's possible. High-end performance and design. Innovative technology and materials. And head-turning aesthetics. A single glance tells you it's a Newton component. A single test drive confirms it. Upgrade your ride. Get Newton.
